

# SUNCHLON (SUNCHLON)

A liquid pharmaceutical manufactured from fresh Japanese Kumazasa bamboo

Class 3 OTC drug

SUNCHLON is a dark green aqueous solution, the result of solubilizing cytoplasm after first removing the resin and destroying the cell walls of the leaves of Poaceae Kumazasa (Scientific name: Sasa veitchii) which is native to Japan's Shinshu alpine region. It has a unique fragrance at room temperature, and a somewhat distinctive bitterness and mild saltiness.

## [Precautions when Using] Please seek advice

1. The following persons are asked to seek the advice of a physician, dentist, pharmacist or registered seller prior to use:

Persons receiving treatment from a physician or dentist.

2. If any of the following symptoms appear after use, you may be suffering from side effects. Please immediately stop taking SUNCHLON and seek the advice of a physician, dentist, pharmacist or registered seller. Please bring this documentation when you seek advice:

(Skin) rash, redness, itching. (Gastrointestinal) nausea, vomiting, constipation, diarrhea

3. If no improvement is observed in your symptoms after continuing to take SUNCHLON, please seek the advice of a physician, dentist, pharmacist or registered seller. Please bring this documentation when you seek advice.

## [Indications] SUNCHLON is recommended to the following persons:

- Persons with no appetite (anorexia) - Persons who tire easily (recovery from fatigue) - Persons suffering from mouth sores
- Persons suffering from alveolar pyorrhea (periodontal disease) - Persons concerned about their bad breath and body odor

## [Dosage and Administration]

Dilute 2 to 3mL in cold water, hot water, tea or milk, etc., and take 2 to 3 hours after meals. Take several times a day. A half dose is recommended for children. The dosage can be doubled in accordance with the symptoms.

<Notes on dosage and administration>

1. Please follow the prescribed dosage and administration.
2. If administering to children, please do so under the guidance of the child(ren)'s guardians.

## [Components and Quantity]

SUNCHLON contains 0.23 - 0.27% copper chlorophyllin sodium.

<Notes on components and quantity>

1. This product uses Japanese Kumazasa bamboo leaves as its raw material, so the smell and taste may differ between individual articles. Please note that there is no difference in quality and effect.
2. You may pass green-colored stools after using this product. This is a result of the green color of the sodium copper chlorophyllin and is no cause for concern.

<Standards> Specific gravity 1.020 - 1.024, pH 7.3 - 7.4

## [Notes on Storage and Handling]

1. Do not expose the unopened product to direct sunlight. Please store in a dry, cool area.
2. Store the product in a refrigerator after opening to preserve its quality. Please use within 2 months of opening.
3. Do not freeze this product, as its container may be damaged. This product freezes at -5°C and below.
